---

## Objective

To continuously advance as a front-end developer, contributing to progressive projects and staying at the forefront of evolving technologies. Committed to achieving excellence in user-centric design, fostering innovation, and making impactful contributions to the digital landscape.

## Skill Highlights

**Frontend (Experienced):** React, Tailwind CSS, Bootstrap, JavaScript, Redux.

**Backend (Familiar):** Express js, Node js, MongoDB, Socket io

**Other Technologies:** Firebase, Git, Github, JWT

---

## Projects

**Fitness-Studio(Team Project):** It's a fitness tracking and wellbeing website distinguished by its community-centric approach, empowering users to achieve and maintain their goals effectively.

Features I implemented

- Fitbit Integration: Enabled seamless data exchange between website and Fitbit app.
- JWT Authentication: Ensured backend security with token-based authentication.
- Set-Goal Section: Implemented dynamic form for user goal creation.
- Real-time Notifications: Utilized Socket.IO for instant updates on user activities.
- Stripe Payment System: Integrated Stripe for user donations in campaigns

Technologies: Reactjs, Express js, Node js, MongoDB, Redux, Socket io, Firebase, JWT

**Pet Adoption(Individual Project):** MERN-powered platform enabling users to add, adopt, donate, while admins manage seamlessly

Features

- Users effortlessly add, adopt, and donate within a unified platform, creating a seamless pet adoption journey.
- Users view only available pets, streamlining the adoption process, and gaining insights into real-time campaign donations.
- Admins exercise full control, managing user roles, overseeing all added pets and campaigns, and ensuring a vibrant platform.

Technologies: React, Node js, Express js, MongoDB, Firebase, Material Tailwind, Formik, Tailwind CSS,
